

## TOGAF® 9 Certified Training Level 1 & 2

TOGAF®, an Open Group standard, is the Open Enterprise Architecture standard used by the world's leading organisations to improve business efficiency. The TOGAF standard states that an 'Enterprise' is any collection of organisations recognizable by a common set of goals.

**Delivery:** Classroom

**Duration:** 4 days

**Certificate:** Examination (voucher included)

**Language:** English

### Course Overview

This is an Open Group accredited course and is a complete package for architects looking to become TOGAF® certified. This four day classroom based training course covers the whole of the TOGAF framework, Version 9.2.

You will be taught by an instructor certified in the TOGAF® standard who also has extensive experience as a practising architect and will guide you in the real world application of the TOGAF® framework.

### Course Contents

There is complete coverage of all the Learning outcomes examined for TOGAF 9.2® certification:

- The business rationale behind Enterprise Architecture and TOGAF
- The overall structure & contents of the official TOGAF® 9 specification.
- The Architecture and Development Method
- The techniques defined for use in architecture development
- The guidelines for adopting the ADM process
- The Architecture Content Framework and the purpose of each of the elements
- The Enterprise continuum and tools
- The concepts, taxonomy and graphical representations of the TOGAF® reference models and their application
- The Architecture Capability Framework
- The Architecture skills framework and why it is needed

### Who Should Take This Course?

- Architects looking for a set of solid processes to help in the organisation, governance and management of architecture teams and cross projects.
- Senior managers, such as project managers and service managers
- Pre-sales negotiators in the IS field

### Prerequisites

- This course is aimed at people who already have some knowledge of Enterprise Architecture, perhaps through an earlier version of the TOGAF® standard or other architecture frameworks.

Once certified you should be able to use the TOGAF® framework to:

- Optimize, across the Enterprise, the often fragmented legacy of processes
- Provide the right balance between IT efficiency and business innovation
- Promote a more efficient and responsive IT operation
- Achieve better value from investment and reduced risk for future investments
- Enable faster, cheaper and simpler procurement of IT and Technology solutions
